Education

Galgotias University

B.Tech, Computer Science & Engineering

Greater Noida, India

Sep 2024 – Jul 2028

- CGPA: 8.6 / 10 — Coursework: DSA, OOP, Operating Systems, Computer Networks, DBMS, System Design

Technical Skills

- **Languages:** Java, C++, Python, JavaScript, SQL
- **Frameworks/Libraries:** React.js, Node.js, Express.js, FastAPI, Tailwind CSS, REST API Design
- **Databases:** MongoDB, MySQL, Supabase (PostgreSQL)
- **Tools & Cloud:** Git, GitHub, Docker, AWS, CI/CD (GitHub Actions, Vercel), Postman, Linux
- **Core Concepts:** DSA, OOP, System Design, DBMS, Operating Systems, Computer Networks

Soft Skills

- Problem Solving — Team Collaboration — Communication — Adaptability — Time Management

Projects

SkyGPT – AI SaaS Chat Platform

May 2026

React, Vite, Node.js, Express, MongoDB, Docker, Gemini API

Live — GitHub

- Built a full-stack SaaS chat platform with a React (Vite) frontend and Node.js/Express REST API, integrating Google Gemini API with GPS/IP-based geolocation for context-aware AI responses.
- Implemented secure stateless authentication using JWT access/refresh token rotation, HttpOnly cookies, bcrypt hashing, and Google/GitHub OAuth 2.0, removing the need for server-side sessions.
- Secured the API with Helmet, CORS policies, express-validator input sanitization, and request rate-limiting to reduce common web vulnerabilities.
- Fixed intermittent MongoDB connection failures via custom DNS resolver config; built an admin CLI for telemetry and a Nodemailer/Ethereal SMTP fallback for password recovery.

FilmyHub – Movie Discovery & Streaming Info Platform

May 2025

React, Vite, Tailwind CSS, TMDB API, Vercel

Live — GitHub

- Developed a responsive movie discovery web app using React (Vite) and Tailwind CSS, fetching real-time movie data (posters, ratings, cast, trailers) from a third-party movie database API.
- Implemented dynamic search and category-based filtering (trending, top-rated, upcoming, genre-wise) for fast, relevant browsing across a large movie catalog.
- Designed a mobile-first, fully responsive UI with optimized image loading and route-based code-splitting to improve page load performance.
- Deployed on Vercel with CI/CD, enabling automatic builds and instant preview deployments on every push.

AI ATS Resume Scorer – Resume-JD Matching Platform (Ongoing)

2026

Python, FastAPI, Streamlit, Docker, spaCy, Sentence Transformers, Groq API

Live — GitHub

- Building a Python-based, full-stack resume-scoring platform (FastAPI backend + Streamlit frontend) that parses resumes (PDF/DOC/DOCX) and scores them against any job description via REST endpoints.
- Applying semantic similarity matching using spaCy (en_core_web_md) and Sentence Transformers (all-MiniLM-L6-v2) to compare skills/experience, improving match relevance beyond keyword search.
- Integrating Groq API (Llama 3) to generate structured, LLM-powered feedback on formatting, keyword coverage, and ATS-compatibility, with Supabase auth (email/password + Google OAuth) and saved analysis history.
- Containerizing services with Docker, automating PDF report generation using WeasyPrint/Jinja2, and validating endpoints through iterative Postman testing; actively being enhanced with new scoring features.

Achievements & Leadership

- **AWS ImpactX Finalist, IIT Bombay TechFest:** Selected as a national finalist among university teams across India; designed and shipped ELLIOT, an AI-driven social impact platform, end-to-end within a 24-hour hackathon window.
- **Competitive Programming:** Ranked Top 3 nationally on the Codolio leaderboard among 700+ participants; achieved AIR 499 on GeeksforGeeks; solved 700+ problems spanning graphs, dynamic programming, trees, and binary search.
- **Campus Leadership:** Served as IIT Delhi Campus Brand Ambassador and Technical Club Coordinator at Galgotias University; mentored 50+ students and organized technical events for 100+ attendees.

Certifications

- Infosys Springboard – Software Engineering Skills — GUVI – Full Stack Web Development — Oracle – DBMS Fundamentals
