Professional Summary

Third-year B.Tech Computer Science student with a strong foundation in Data Structures & Algorithms(c++, java) 700+ problems solved, and active competitive programming experience. Hands-on experience building full-stack web applications using the MERN stack and Python, seeking a Software Engineering Internship.

Technical Skills

- **Languages:** Java, C++, Python
- **Frameworks/Libraries:** Node.js, Express.js, FastAPI, Tailwind CSS, REST API Design
- **Databases:** MongoDB, MySQL, Supabase (PostgreSQL)
- **Tools & Cloud:** Git, GitHub, CI/CD (GitHub Actions, Vercel)
- **Core Concepts:** DSA, OOP, System Design, DBMS, Operating Systems, Computer Networks

Soft Skills

- Problem Solving — Team Collaboration — Adaptability — Time Management

Professional Experience

- **Forge Virtual Experience Programs** – Completed job-simulation programs by **Goldman Sachs**, **Deloitte**, and **Walmart Global Tech**.

Projects

AI ATS Resume Scorer – Resume-JD Matching Platform (Ongoing) 2026
Python, FastAPI, Streamlit, Docker, spaCy, Sentence Transformers, Groq API [Live Demo](#) — [GitHub](#)

- Building a Python-based, full-stack resume-scoring platform (FastAPI backend + Streamlit frontend) that parses resumes (PDF/DOC) and scores them against any job description via REST endpoints.
- Applying semantic similarity matching using spaCy (en_core_web_md) and Sentence Transformers (all-MiniLM-L6-v2) to compare skills/experience, improving match relevance beyond keyword search.
- Integrating Groq API (Llama 3) to generate structured, LLM-powered feedback on formatting, keyword coverage, and ATS-compatibility, with Supabase auth (email/password + Google OAuth) and saved analysis history.
- Containerizing services with Docker, automating PDF report generation using WeasyPrint/Jinja2, and validating endpoints through iterative Postman testing; actively being enhanced with new scoring features.

SkyGPT – AI SaaS Chat Platform May 2026
React, Vite, Node.js, Express, MongoDB, Docker, Gemini API [Live Demo](#) — [GitHub](#)

- Built a full-stack SaaS chat platform with a React (Vite) frontend and Node.js/Express REST API, integrating Google Gemini API with GPS/IP-based geolocation for context-aware AI responses.
- Implemented secure stateless authentication using JWT access/refresh token rotation, HttpOnly cookies, bcrypt hashing, and Google/GitHub OAuth 2.0, removing the need for server-side sessions.
- Secured the API with Helmet, CORS policies, express-validator input sanitization, and request rate-limiting to reduce common web vulnerabilities.
- Fixed intermittent MongoDB connection failures via custom DNS resolver config; built an admin CLI for telemetry and a Node-mailer/Ethereal SMTP fallback for password recovery.

Education

Galgotias University Greater Noida, India
B.Tech, Computer Science & Engineering Sep 2024 – Jul 2028

- CGPA: 8.6 / 10 — Coursework: DSA, OOP, Operating Systems, Computer Networks, DBMS, System Design

Achievements & Leadership

- Solved **700+** **DSA problems** across LeetCode, GeeksforGeeks, Codeforces & CodeChef.
- Earned the official **LeetCode 500 Days Badge** for consistent problem-solving.
- **Top 3, Codolio Leaderboard** (Galgotias University) — **AIR 499** on GeeksforGeeks coding leaderboard.
- **AWS ImpactX Challenge Finalist** – selected for IIT Bombay TechFest; built and shipped ELLIOT, an AI-driven social impact platform within a 24-hour hackathon.
- **GeeksforGeeks DSA Challenge Finalist** – qualified for the final round and received official GeeksforGeeks merchandise (T-shirt, Pen & Stickers).

Certifications

- Infosys Springboard – Java, DBMS, SQL, Communication Skills — GUVI – Full Stack Web Development, Java
- GeeksforGeeks – Java with DSA — Red Hat – Operating Systems — Oracle – Computer Networks — Forge – DSA
